OBJECTIVE

A highly motivated and detail-oriented Masters of Computer Applications (MCA) student with expertise in software development, web development, and computer hardware. Seeking an opportunity to contribute my technical skills and passion for learning to a dynamic team, while continuously developing my capabilities.

PROJECTS

ASK-Bank: A bank website

Developed a dynamic banking website using HTML, CSS, JavaScript, PHP and MySQL to provide secure online banking services. Enhanced user experience by implementing a visually appealing and interactive interface with features like account management, digital payments and loan services.

Rakshak2k25 - NCC Fest Registration Website

Developed a comprehensive registration portal for college NCC fest using HTML, CSS and JavaScript. Created an engaging platform that allows students to register for events and view schedules. Implemented real-time participant tracking. Enhanced the user experience with responsive design.

PROFESSIONAL ATTRIBUTES

- Creative thinker with a passion for multimedia, system development, and animation.
- Strong technical skills in both software programming and hardware assembly.
- Effective communicator with excellent presentation and teamwork abilities.
- Quick learner, adaptable to new technologies, and skilled in problem-solving.
- Enthusiastic about PC building, drawing, and photo editing.
- Enjoys playing Cricket, Kabaddi, and Volleyball, demonstrating strong teamwork and leadership skills.
